DETAILED ACTION

Claims 1-35 are currently pending.

Election/Restrictions

Applicant's election without traverse of Group I, claims 1-15 and 30-35, in the reply filed on 10/31/06 is acknowledged. However, upon reconsideration of the claims, the Examiner has determined that the restriction requirement between Groups I and II was unnecessary, and it is withdrawn. Claims 16-29 are rejoined to Group I and will be examined on their merits to the extent they read on the elected species, where appropriate.

Applicant's election without traverse of the species "C₁₆-C₂₄ fatty acid esters" as the hydrophobic agent; "poly(lactide-co-glycolic) acid" as the polymer; "proteins" as the active agent; and "alkyl esters of benzoic acid" as the solvent in the reply filed on 10/31/06 is acknowledged. However, upon consideration, the Examiner has determined that further species election is required.

This application contains claims directed to the following patentably distinct species:

Proteins: (a) human growth hormone, (b) alpha-interferon, (c) beta-interferon, (d) gamma-interferon, (e) erythropoietin, (f) glucagon, (g) calcitonin, (h) interleukin-1, (i) interleukin-2, (j) Factor VIII, (k) Factor IX, (l) luteinizing hormone, (m) relaxin, (n) follicle-stimulating hormone, (o) atrial natriuretic factor and (p) filgrastim, as in claims 13, 27-29, and 35; elect ONE particular protein.

Art Unit: 1651

Alkyl esters of benzoic acid: (q) benzyl benzoate and (r) ethyl benzoate, as in claims 28 and 29; elect ONE particular alkyl ester.

The species are distinct because none is rendered obvious by the others in its group and because the disclosure does not connect them by any design, operation, or effect. See M.P.E.P. § 806.04(b). A requirement for restriction is permissible if there is a patentable difference between the species as claimed and there would be a serious burden on the examiner if restriction is not required. See M.P.E.P. § 808.01(a). In this case, considering enablement, utility, and description issues for each claimed species, as well as conducting a thorough search of the prior art for each and every combination embodied by the present claims, would pose a serious burden to the examiner.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 13, 27-29, and 35 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species.
MPEP § 809.02(a).

A telephone call was made to Edgar Cataxinos on 12/4/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
